

Product documentation : Learning Management System

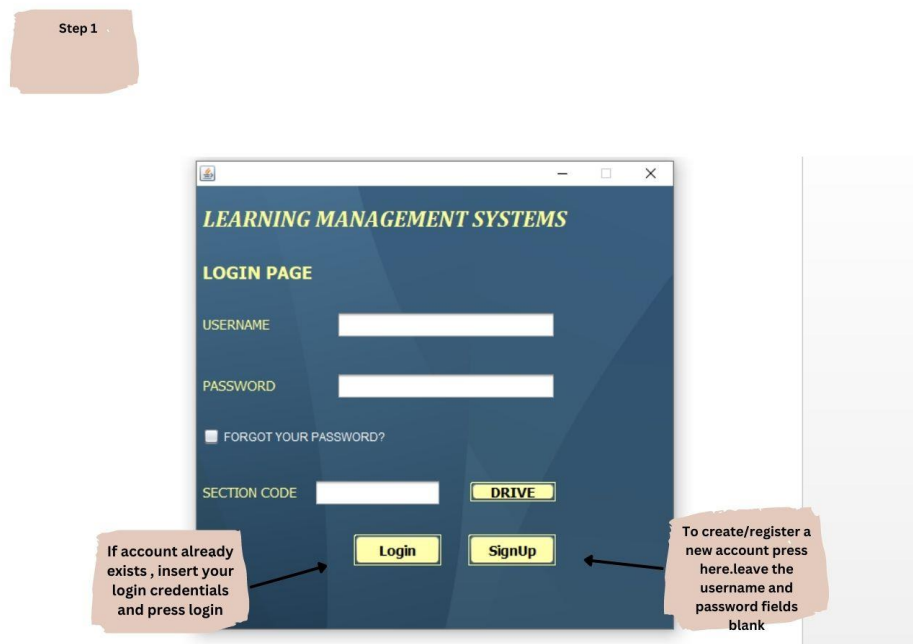

Introduction

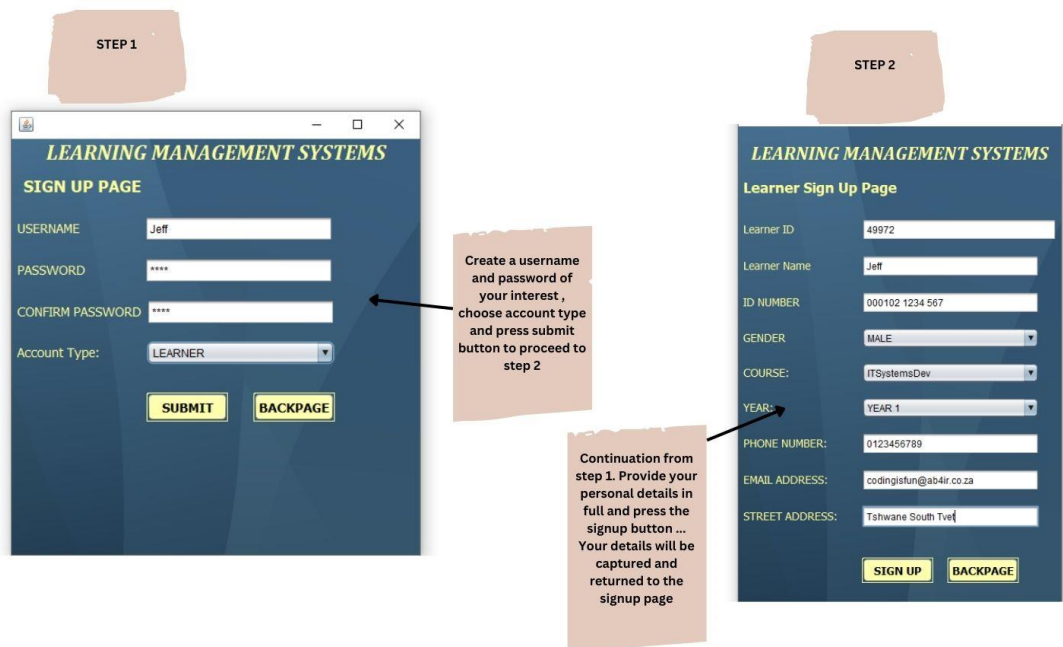

The Learning Management System (LMS) is an online platform that enables users to register their profiles either as student or as an employee, upload and store text documents. This documentation will guide you through the main features of the LMS and how to use them effectively. This software documentation outlines the features and functionalities of a Learning Management System (LMS).

Registration

To use the LMS, You will first be directed to the Login Page , whereby you are required to insert your login details and press Login to proceed.

If the user doesn't have an account press the SignUp Button to create an account by registering your profile either as a Learner or Employee . Please keep in mind that everything is case sensitive.

Uploading documents

To upload texts, click on the "Upload File" button and select from the dropdown menu. Choose the file you wish to upload and give it a suitable title and description. You can also select a category for your text to make it easier to find later. Once you have filled in the required information, click on "Upload" to complete the process.

Search and Browse

To search for specific texts or documents, use the search bar located at the top of the page. You can search by title, category, or keywords. You can also browse through the different

categories available by clicking on the "Categories" button.

Process Documentation

Getting Started

The LMS requires users to register their profiles to access the platform. Upon registration, users will be asked to provide their personal information such as their name, email, and contact information. They will also be asked to upload their profile picture and any other relevant information.

Profile Management

Once users have registered, they can log in to their profiles and manage their personal information. They can update their profile picture, edit their personal details, and upload text documents related to their academic progress or other relevant information. Users can also view their academic transcripts and download them if necessary.

Assignment and Test Management

Students can use the LMS to upload their assignments and take tests and exams online. They can also check their results online, and download their academic transcripts. The LMS provides a centralized platform for managing all academic tasks, making it easy for both students and instructors to monitor progress.

Communication

The LMS also provides a communication platform for admin users to communicate with students. Admin users can send messages to individual students or groups of students, and students can respond to messages directly within the LMS.

Notification and Alert System

The LMS has a notification and alert system that alerts users when there are new messages or activities that require their attention. For example, an admin user may receive a notification when a student has uploaded an assignment or when a message has been sent.

Conclusion

The Learning Management System is a comprehensive platform that offers a range of features and functionalities for managing academic tasks. It allows users to register their profiles, upload texts and profile pictures, and upload text documents. Students can use it to upload assignments, take tests and exams online, check their results online, and download their academic transcripts. Admin users can log in to see when students have made any activities on their profiles that require their attention or actioning. The app also allows admins to communicate with students through the messaging platform.
